

[illegible]

L2	- Power conductor (phase) black	- Protection class I: luminaire with a protective ground wire
L1	- Power conductor (phase) brown	- Protection class II: luminaire without a protective ground wire
N	- Neutral conductor (neutral) blue	- Protection class III: luminaire powered by safe low voltage
PE	- Protective conductor (yellow/green)	- Minimum distance from illuminated objects
L+	- Power conductor – positive potential "+", red	- Symbol: Connection to the network from the installation side
L-	- Power conductor – negative potential "-", black	- Symbol: Connection to the network from the luminaire side
		- Replace cracked glass protective cover
		- Degree of protection against solid objects and water ingress
		- For indoor use
		- For outdoor use
